Stern Mount Installation Guide

Secure. Stable. Built for Shallow Water.

This guide walks you through installing your Stayput Anchor Stern Mount.
Follow the steps below for a secure and reliable installation.

RECOMMENDED MOUNTING LOCATION

REQUIRED TOOLS

- Drill
- 3/16” Drill Bit
- Marker or Pencil
- Wrench or Socket
- Measuring Tape
- Marine Sealant (Recommended)

BEFORE DRILLING

INSPECT THE MOUNTING AREA AND VERIFY THERE ARE NO:

- Wiring
- Fuel Lines
- Steering Components
- Hoses
- Other Obstructions

1 CHOOSE THE MOUNTING LOCATION

Select a strong, flat section on the stern or transom where the mount can be securely attached and the pole spike has a clear deployment path.

2 TEST FIT THE MOUNT

Hold the Classic Stern Mount in the desired location and verify the position and deployment angle. Confirm the mount sits properly against the transom and the spike inserts and removes without obstruction.

3 MARK THE MOUNTING HOLES

Hold the mount firmly in place and mark each mounting location. Double-check measurements to ensure proper alignment before drilling.

4 DRILL PILOT HOLES

Using a 3/16" drill bit, drill pilot holes at the marked locations. For fiberglass boats, lightly countersink the gelcoat to help prevent cracking.

5 APPLY MARINE SEALANT

Apply marine sealant around each pilot hole and along the back side of the mount where it contacts the boat to help create a watertight seal.

6 SECURE THE MOUNT

Position the mount over the pilot holes and install the included lag screws. Tighten evenly until the mount is firmly secured against the stern.

7 TEST FIT THE POLE SPIKE

Insert the Stayput Anchor pole spike and confirm it deploys and removes smoothly. Verify the mount feels solid and properly aligned.

8 PERFORM A FINAL INSPECTION

Verify all hardware is tight, the mount is seated properly, and sealant coverage is complete around all mounting points.

SPECIFICATIONS

DRILL BIT SIZE
3/16” (4.76 mm)

MOUNTING HARDWARE
INCLUDED LAG SCREWS

SEALANT RECOMMEND
3M MARINE ADHESIVE SEALANT FAST CURE 4200FC

IMPORTANT NOTES
Always verify installation before use. Stayput Anchor systems are designed for shallow water use. Use caution in changing conditions.
